Agriculture And Food In Crisis

Sustainable agriculture practices can protect the environment and produce high-quality, safe, and affordable food. Our goal is to promote such practices while eliminating harmful “factory farming” methods and strengthening government oversight of genetically engineered food.

Food and Agriculture -- Home - allAfrica.com

Agriculture is the science and art of cultivating plants and livestock. Agriculture was the key development in the rise of sedentary human civilization, whereby farming of domesticated species created food surpluses that enabled people to live in cities. The history of agriculture began thousands of years ago. After gathering wild grains beginning at least 105,000 years ago, nascent farmers ...

Food goes to the heart of civilization, and is therefore part of numerous issues. This section groups together a number of different articles throughout the site on issues ranging from hunger, food aid, consumption to genetic modification of food, and more.

Food and Agriculture Issues — Global Issues

World food prices increased dramatically in 2007 and the first and second quarter of 2008, creating a global crisis and causing political and economic instability and social unrest in both poor and developed nations. Although the media spotlight focused on the riots that ensued in the face of high prices, the ongoing crisis of food insecurity had been years in the making.
