In the past few years heavy antibiotic use has been linked to the inflammatory bowel disorder, Crohn's disease, and to children developing allergies such as hayfever and asthma. An association between antibiotic exposure and asthma is accepted both by the medical profession and the Department of Social Security in the UK and the Health Department in Australia.

Immunotherapy to Aeroallergens. What is immunotherapy? Immunotherapy is the practice of administering gradually increasing doses of an allergen extract (e.g. pollen, dust mite, mould, pet dander) in order to reduce the symptoms of the allergic rhinitis (known as hayfever), eczema or asthma that it causes.

In a Panic: A few years ago, an otolaryngologist from a children's hospital in another state called in a panic to ask me if they could send a 3-year-old boy to me by helicopter (they had heard that I was

a “sinus guy”).

i just found this too...in a search for ideas. i will post more later-after i read more posts. I have 'asthma' and stress, like everyone in the world, of course. but never had an attack like recently. yawning for air, etc is something I have always dealt with, in a very way, but have always been quite active, etc. but recently i had a racy heart that sent me to the clinic in the clinic in the ...

Aftercare After surgery, the patient wakes up in the recovery area and is given medication to reduce swelling and pain. When the patient has recovered from surgery, he or she is sent home and usually given a week's course of antibiotics to be taken by mouth. The patient may also develop a sore throat, especially when swallowing or speaking, or moderate pain at the back of the nose and throat ...
