

Black Apollo Of Science The Life Of Ernest Everett Just

Black Apollo Of Science The

Black science fiction or black speculative fiction is an umbrella term that covers a variety of activities within the science fiction, fantasy, and horror genres where people of the African diaspora take part or are depicted. Some of its defining characteristics include a critique of the social structures leading to black oppression paired with an investment in social change.

Black Apollo by Dwayne A. Day Monday, November 29, 2010. During the height of the race to the Moon, NASA and the top secret National Reconnaissance Office (NRO) planned a series of Apollo missions to carry a large reconnaissance satellite to lunar orbit where astronauts would photograph the lunar surface and map out landing sites for later manned landings.
