

Breast Imaging Companion 3rd Edition

Breast Imaging Companion 3rd Edition

Fibrocystic breast changes is a condition of the breasts where there may be pain, breast cysts, and breast masses. The breasts may be described as "lumpy" or "doughy". Symptoms may worsen during certain parts of the menstrual cycle. It is not associated with cancer.. Risk factors include an early age at first menstrual period and either having children late or not having children.

Breast cancer classification and patient stratification is crucial in terms of determining treatment strategy in clinic. Breast tumors are classified into two groups: in situ (20% of all cases) and invasive breast tumors (80% of all cases). Based on their location, in situ breast cancers are further classified into two groups: ductal carcinoma in situ (DCIS, ~80% of in situ breast cancers ...
