31 Woodcock-Johnson III Tests of Cognitive Abilities

Cognitive bias mitigation is the prevention and reduction of the negative effects of cognitive biases – unconscious, automatic influences on human judgment and decision making that reliably produce reasoning errors.. Coherent, comprehensive theories of cognitive bias mitigation are lacking. This article describes debiasing tools, methods, proposals and other initiatives, in academic and ...

About Brain Activation Therapy Brain Activation Therapy (BAT) provides for the specific needs and goals of the individual based on their personal traits, current cognitive state and life history.

Brain Activation | A Wiser Mind

Cognitive Flexibility. Cognitive flexibility is a critical executive function that can be broadly defined as the ability to adapt behaviors in response to changes in the environment.

Cognitive Flexibility - an overview | ScienceDirect Topics

Executive functions (collectively referred to as executive function and cognitive control) are a set of cognitive processes that are necessary for the cognitive control of behavior: selecting and successfully monitoring behaviors that facilitate the attainment of chosen goals. Executive functions include basic cognitive processes such as attentional control, cognitive inhibition, inhibitory ...

Problem solving is a signature attribute of adult humans, but we need to understand how this develops in children. Tool use is proposed as an ideal way to study problem solving in children less than 3 years of age because overt manual action can reveal how the child plans to achieve a goal.

The Development of Problem Solving in Young Children: A ...

What are the symptoms of dyscalculia? Because there has been so little work on dyscalculia, there is no definite list of symptoms. But there is still a lot that we do know.

I think putting the mathematics in a context really helps make it more interesting. I took trigonometry in high school, and absolutely loathed it, but then when I took statistics (which isn't just raw number crunching, at the very least there's a context) I enjoyed math immensely, and the same goes for a formal logic class I took last year.

Why I Love Mathematics (the real thing) - vladdolezal.com

Some authors, such as philosopher Colin McGinn and linguist Steven Pinker, think that the difficulties we experience in dealing with the hard problem of consciousness are simply due to the limitations of the human brain. This brain is the product of evolution, and, like the brains of other animals, it has its cognitive limits. For example, a human brain cannot hold 100 digits in its short-term ...
