

Common Sense Physics Cosmology

Common Sense Physics Cosmology

Physics and astrophysics have played a central role in shaping the understanding of the universe through scientific observation and experiment. Physical cosmology was shaped through both mathematics and observation in an analysis of the whole universe. The universe is generally understood to have begun with the Big Bang, followed almost instantaneously by cosmic inflation; an expansion of ...

Cosmology - Wikipedia

Relativity: Relativity, wide-ranging physical theories formed by the German-born physicist Albert Einstein. 'Special relativity' is limited to objects that are moving with respect to inertial frames of reference. 'General relativity' is concerned with gravity, one of the fundamental forces in the universe.

William Lane Craig is a prolific Christian philosopher, apologist, author, and public debater. He is the best debater – on any topic – that I've ever heard. As far as I can tell, he has won nearly all his debates with atheists. When debating him, atheists have consistently failed to put forward solid arguments, and consistently failed to point out the flaws in Craig's arguments.

William Lane Craig's Debates ... - Common Sense Atheism

In statistical mechanics, entropy is an extensive property of a thermodynamic system. It is closely related to the number Ω of microscopic configurations (known as microstates) that are consistent with the macroscopic quantities that characterize the system (such as its volume, pressure and temperature). Under the assumption that each microstate is equally probable, the entropy is the natural ...

Entropy - Wikipedia

I would like to emphasize the commonsensical nature of the problem of evil. In considering the idea that there exists an all-powerful, all-knowing, and all-good person who created the universe, we can examine the universe to see if its features are congruent with this idea.

The problem of evil is a good common-sense argument ...

Sam Harris launched the New Atheism movement. William Lane Craig is a philosopher, historian, and expert debater for evangelical Christianity. Recently, they debated for the first time: video above, audio here. Below, I review the debate. Other reviews of the debate include:

Sam Harris vs. William Lane Craig ... - Common Sense Atheism

Neil deGrasse Tyson talked of "a God of the gaps" when it comes to believing in a God. Many individuals, particularly of religious persuasion, believe that simply because science has yet to answer every question, it is a reason for believing in a theistic religion.

Galaxies are sprawling systems of dust, gas, dark matter, and anywhere from a million to a trillion stars that are held together by gravity. Nearly all large galaxies are thought to also contain ...

Galaxies—facts and information - National Geographic

Outline. 0) Introduction a) Purpose of this FAQ b) General outline c) Further sources for information 1) What is the Big Bang theory? a) Common misconceptions about the Big Bang b) What does the theory really say? c) Contents of the universe d) Summary: parameters of the Big Bang Theory 2) Evidence a) Large-scale homogeneity b) Hubble diagram c) Abundances of light elements

Evidence for the Big Bang - TalkOrigins Archive: Exploring ...

by Christos Stremmenos. Read the whole article Download the ZIP file. Energy is a very fundamental physical property of the Universe. It is defined, generically, as the ability to produce work; it can take many forms: kinetic, thermal, chemical, biochemical, electromagnetic, nuclear;

may originate from matter: remember the Einstein equation $E = mc^2$.

Journal of Nuclear Physics

Physics: Physics, science that deals with the structure of matter and the interactions between the fundamental constituents of the observable universe. In the broadest sense, physics (from the Greek *physikos*) is concerned with all aspects of nature on both the macroscopic and submicroscopic levels. Its

Chip-Scale Atomic Clock. Authors: George Rajna Comments: 62 Pages. Physicists at the National Institute of Standards and Technology (NIST) and partners have demonstrated an experimental, next-generation atomic clock-ticking at high "optical" frequencies-that is much smaller than usual, made of just three small chips plus supporting electronics and optics. [38]
