Comparative Metric Semantics Of Programming

Programming language theory (PLT) is a branch of computer science that deals with the design, implementation, analysis, characterization, and classification of programming languages and their individual features. It falls within the discipline of computer science, both depending on and affecting mathematics, software engineering, linguistics and even cognitive science.

In the context of software engineering, software quality refers to two related but distinct notions: . Software functional quality reflects how well it complies with or conforms to a given design, based on functional requirements or specifications. That attribute can also be described as the fitness for purpose of a piece of software or how it compares to competitors in the marketplace as a ...

2017¶ NLTK 3.2.5 release: September 2017 Arabic stemmers (ARLSTem, Snowball), NIST MT evaluation metric and added NIST international_tokenize, Moses tokenizer, Document Russian tagger, Fix to Stanford segmenter, Improve treebank detokenizer, VerbNet, Vader, Misc code and documentation cleanups, Implement fixes suggested by LGTM

NLTK News — NLTK 3.4.1 documentation

In my opinion, a much better choice is the language Lojban. The language has many advantages. The grammar is based on Boolean algebra (it is possible to use a subset of Lojban as a computer programming language).. The letters in Lojban each denote a single phoneme, instead of the multiple phonemes English uses.

This project contains an overview of recent trends in deep learning based natural language processing (NLP). It covers the theoretical descriptions and implementation details behind deep learning models, such as recurrent neural networks (RNNs), convolutional neural networks (CNNs), and reinforcement learning, used to solve various NLP tasks and applications.

Modern Deep Learning Techniques Applied to Natural ...
