### **Emergence Of Man Into The**

In philosophy, systems theory, science, and art, emergence occurs when an entity is observed to have properties its parts do not have on their own. These properties or behaviors emerge only when the parts interact in a wider whole. For example, smooth forward motion emerges when a bicycle and its rider interoperate, but neither part can produce the behavior on their own.

Humanism, system of education and mode of inquiry that originated in northern Italy during the 13th and 14th centuries and later spread through continental Europe and England. The term is alternatively applied to a variety of Western beliefs, methods, and philosophies that place central emphasis on the human realm.

This entry dates the emergence of the freak show as a key form of Victorian leisure to the 1840s. It demonstrates that these exhibitions of physical difference served as spaces for negotiations amongst doctors, scientists, anthropologists, and a mass consumer public about how to distinguish “normal” and “abnormal” bodies and about the cultural meanings attached to these classifications.

History of Europe - The emergence of modern Europe, 1500-1648: The 16th century was a period of vigorous economic expansion. This expansion in turn played a major role in the many other transformations—social, political, and cultural—of the early modern age. By 1500 the population in most areas of Europe was increasing after two centuries of decline or stagnation.

Rift Valley fever virus (RVFV) is a mosquito-borne virus of the genus Phlebovirus, family Bunyaviridae. The RVFV genome is composed of three segments of single-stranded RNA, referred to as large (L), medium (M) and small (S). The bunyavirus ribonucleoproteins corresponding to each genomic segment appear circular when observed by electron microscopy, although a simplified schematic detailing ...
