### **Geochemistry Of The Earth Surface**

The next Geochemistry of the Earth's Surface meeting (GES 10) will be held in the center of Paris, France, between August 18th and 22nd, 2014. GES 10 will emphasize Critical Zone cutting edge research at all scales, from the elementary processes to global biogeochemical cycles.

### **Geochemistry of the Earth's surface (GES-10)**

The Earth Surface Geochemistry group exploits the record of the chemistry of the past Earth held in sediments and rocks to decipher the evolution of conditions at the surface of the planet. The group also investigates the key components of chemical cycles on the modern Earth by studying the chemistry of soils, rivers, lakes and the oceans.

About this book. Geochemistry at the surface of the earth is dominated by two somewhat antagonistic forces: chemical reactions which attempt to attain a steady state (equilibrium) and geological movement of materials in time and space which changes the parameters that control chemical equilibrium.
