Facades / Window Walls This two-panel system is designed so that the interior and exterior glazing panels are independent of one another. Our Removable Skin Technology (RST) ensures that if there is a future need for updating the exterior, those panels can be changed without interrupting ongoing building operations.

The Griffin Construction department assists growers nationwide in all aspects of greenhouse planning, construction and maintenance. Whether it's a new operation or expansion, upgrades or replacements, our team can help.

About Construction Products & Services | Griffin ...

Timber frame is a popular construction system for those looking for a fast build time on site and factory standards. No longer a niche within the self build market, according to a 2017 report*, the number of projects built with timber frame (and SIPs) is almost equal to the number of projects built with masonry.

Sustainable architecture is architecture that seeks to minimize the negative environmental impact of buildings by efficiency and moderation in the use of materials, energy, and development space and the ecosystem at large. Sustainable architecture uses a conscious approach to energy and ecological conservation in the design of the built environment.

Sustainable architecture - Wikipedia

The following definitions are extracted from WDMA I.S.1A, Industry Standard for Architectural Wood Flush Doors and WDMA I.S.6A, Industry Standard for Architectural Stile and Rail Doors Astragal — A moulding or trim attached to the meeting edges of adjacent door leaves in order to prevent swing through and to conceal the gap. Also may be used for sound control, bullet resistance and x-ray ...
