Traditionally electrical networks have been treated mainly as physical entities that connect electricity suppliers to consumers. However, a modern grid is empowered by the internet of things, distributed generation, and networked computational subsystems to support the incorporation of renewable energy resources, electric vehicles, and energy markets.

Tomography is imaging by sections or sectioning, through the use of any kind of penetrating wave. The method is used in radiology, archaeology, biology, atmospheric science, geophysics, oceanography, plasma physics, materials science, astrophysics, quantum information, and other areas of science. The word tomography is derived from Ancient Greek τόμος tomos, "slice, section" and γράφω ...

In statistics and image processing, to smooth a data set is to create an approximating function that attempts to capture important patterns in the data, while leaving out noise or other fine-scale structures/rapid phenomena. In smoothing, the data points of a signal are modified so individual points (presumably because of noise) are reduced, and points that are lower than the adjacent points ...

A-FILTER - This program calculates the resistor and capacitor values for various op-amp based active filter configurations. Calculations will simultaneously include 7 response curves for each filter (greater than 1st order); Best delay, Compromise, Flattest, Slight dips, 1db dips, 2db dips and 3db dips.
