Universal health coverage is a broad concept that has been implemented in several ways. The common denominator for all such programs is some form of government action aimed at extending access to health care as widely as possible and setting minimum standards.

List of countries with universal health care - Wikipedia

Universal health care in most countries has been achieved by a mixed model of funding. General taxation revenue is the primary source of funding, but in many countries it is supplemented by specific levies (which may be charged to the individual and/or an employer) or with the option of private payments (by direct or optional insurance) for services beyond those covered by the public system.
