Infectious Diseases and Arthropods - Springer

Introduction. Transmission of these pathogens to humans by the arthropod vector can cause a variety of human diseases, including malaria, yellow fever, Chagas disease, and dengue fever. These and other arthropod-borne diseases can result in a wide range of effects, from mild flulike

symptoms to death.

Arthropod-borne Disease | Encyclopedia.com

With the exception of a few tropical medicine schools worldwide, current medical education programs include almost zero discussion of the interface between infectious diseases and entomology. That is why this book was initially published in the first edition almost 17 years ago. The third edition of this valuable infectious disease entomology book updates all existing ...
