Universal grammar (UG) in linguistics, is the theory of the genetic component of the language faculty, usually credited to Noam Chomsky. The basic postulate of UG is that a certain set of structural rules are innate to humans, independent of sensory experience. With more linguistic stimuli received in the course of psychological development, children then adopt specific syntactic rules that ...

Universal grammar - Wikipedia

The subject in a simple English sentence such as John runs, John is a teacher, or John was run over by a car is the person or thing about whom the statement is made, in this case 'John'. Traditionally the subject is the word or phrase which controls the verb in the clause, that is to say with which the verb agrees (John is but John and Mary are). If there is no verb, as in John - what an idiot ...

style in technical writing. use of units with numbers. All numerical values that have dimensions

must have their units specified. In general, the units must follow the numerical value every time. However, in a table of numbers, the units may be specified at the top of the column, provided all of the values have the same units.

One thing blogging and good copywriting share is a conversational style, and that means it's fine to fracture the occasional rule of proper grammar in order to communicate effectively. Both bloggers and copywriters routinely end sentences with prepositions, dangle a modifier in a purely technical sense, or make liberal use of the ellipsis when an EM dash is the correct choice—all in order ...
