Mark Jackman on October 15, 2018. Eric did such a fantastic job with our sons senior pictures! Not only is he incredibly professional but very kind and accommodating of schedules, and worked very hard to customize the photos and shoot to match our sons personality!

Eric Abbott - Portrait photographer in the Denver, CO area

The glans penis is a structure at the distal end of the penis in male mammals. It is the sensitive bulbous structure at the end of the human penis, and is anatomically homologous to the clitoral glans of the human female. The glans penis may be smooth, spiny, elongated, or divided in other mammals. Typically, the glans is completely or partially covered by the foreskin in humans, except in men ...

Our hospital is fortunate to have many international exchanges through veterinary science and medicine. Amongst all, we welcome a senior student (final year of veterinary school) from the Veterinary College of Colorado State University where our hospital director emeritus, Dr. Gen Kato, for a 4 weeks internship program each year.

International Exchanges □ Daktari Animal Hospital

The Onion is the world's leading news publication, offering highly acclaimed, universally revered coverage of breaking national, international, and local news events. Rising from its humble beginnings as a print newspaper in 1756, The Onion now enjoys a daily readership of 4.3 trillion and has grown into the single most powerful and influential organization in human history.

About The Onion

A glânde é a estrutura bulbosa sensível na extremidade distal do pênis humano. A glânde é anatomicamente homóloga à glânde do clitóris da fêmea humana. Tipicamente, a glânde é completamente ou parcialmente coberta pelo prepúcio, exceto em homens que foram circuncidados. O prepúcio geralmente pode ser retraído e passado pela glânde, e pode se retrair automaticamente durante uma ...

One of the best treasure tales in the history of the American West is the Lost Dutchman Mine. Shrouded in mystery, the mine is not only allegedly rich in gold, but is also said to have a curse upon it, leading to a number of strange deaths, as well as people who mysteriously go "missing" when they attempt to locate the old mine.

O termo "pênis" se aplica a muitos órgãos análogos de diversos animais, mas não a todos. Por exemplo, o órgão intromitente da maioria dos cefalópodes é o hectocotylus, um tentáculo especializado, e as aranhas macho usam seus pedipalpos. Mesmo dentro dos vertebrados existem variantes morfológicas com terminologia específica, tais como os hemipenes.
