

Nuclear Ethics

Nuclear Ethics

Ethics and Concerns Helpline. The Global Ethics and Concerns Helpline is a mechanism for employees and business partners of Westinghouse to ask questions and report compliance violations such as anti-trust issues, bribery of government officials, commercial corruption, financial fraud, and falsification of non-financial records.

Westinghouse Nuclear > About > Ethics and Compliance

Westinghouse Electric Company is the world's leading supplier of safe and innovative nuclear technology. We provide our utility customers around the world with the most reliable, dependable nuclear power plants, nuclear fuel, plant automation and operating plant products and services.

Nuclear Energy | Westinghouse Nuclear

A nuclear weapon (also called an atom bomb, nuke, atomic bomb, nuclear warhead, A-bomb, or nuclear bomb) is an explosive device that derives its destructive force from nuclear reactions, either fission (fission bomb) or from a combination of fission and fusion reactions (thermonuclear bomb). Both bomb types release large quantities of energy from relatively small amounts of matter.

The debate over the atomic bombings of Hiroshima and Nagasaki concerns the ethical, legal, and military controversies surrounding the atomic bombings of Hiroshima and Nagasaki on 6 August and 9 August 1945 at the close of World War II (1939–45). The Soviet Union declared war on Japan an hour before 9 August and invaded Manchuria at one minute past midnight; Japan surrendered on 15 August.
