Recommender Systems For Information Providers

Instant messaging systems, such as Telegram, WhatsApp, Twitter Direct Messaging, Kik, Skype and Snapchat are all targets for spammers. Many IM services are publicly linked to social media platforms, which may include information on the user such as age, sex, location and interests. Advertisers and scammers can gather this information, sign on to the service, and send unsolicited messages which ...

Abstract: A significant portion of user requests in Alexa is about task completion, in particular, fulfilled by taking actions on entities such as listening to music and ordering food from restaurants. With voice interface, users interact with Alexa via natural languages. In this talk, we show an end-to-end system from understanding user's utterances to invoking service providers to take ...

Industry Day Schedule | 12th ACM International WSDM Conference

The goal of fairness-aware data mining is to analyze data while taking into account potential issues of fairness, discrimination, neutrality, and/or independence.

Fairness-Aware Data Mining | Toshihiro Kamishima

Contextual advertising is a form of targeted advertising for advertisements appearing on websites or other media, such as content displayed in mobile browsers. The advertisements themselves are selected and served by automated systems based on the identity of the user and the content displayed.

2.2. Analysis and synthesis of the literature. Our analysis focused on summarizing and analyzing existing theories on big data value realization, highlighting prevailing debates related to this topic, and identifying supporting evidence and gaps in the literature (Jones and Gatrell, 2014). Our aim was to provide new insights that can contribute to future research and thus, to go beyond merely ...
