

Stroke Care A Practical Manual

Stroke Care A Practical Manual

A stroke is a medical condition in which poor blood flow to the brain results in cell death. There are two main types of stroke: ischemic, due to lack of blood flow, and hemorrhagic, due to bleeding. Both result in parts of the brain not functioning properly. Signs and symptoms of a stroke may include an inability to move or feel on one side of the body, problems understanding or speaking ...

The adult or child you're caring for may find it difficult to communicate because of a physical health problem - such as hearing difficulty, a problem with their eyesight or a developmental disorder - or because of a disorder affecting their brain, such as Alzheimer's disease or stroke.. Communication problems can come on gradually or happen overnight.

How to care for someone with communication difficulties - NHS

Carotid artery dissection is a separation of the layers of the artery wall supplying oxygen-bearing blood to the head and brain and is the most common cause of stroke in young adults. (In vascular medicine, dissection is a blister-like de-lamination between the outer and inner walls of a blood vessel, generally originating with a partial leak in the inner lining.)

Carotid artery dissection - Wikipedia
