The best full screen experience. In MIUI 10, we removed all elements that could break the visual integrity of a full screen device. There's no segmentation brought about by divisions and conflicting colors here, everything important is presented in the form of neat cards with rounded corners which rhyme with hardware elements.

Interaction design has its origins in web and graphic design, but has grown into a realm of its own. Far from merely working with text and pictures, interaction designers are now responsible for creating every element on the screen that a user might swipe, click, tap, or type: in short, the interactions of an experience.
