### **Vector Bundles And Differential Equations**

A vector space (also called a linear space) is a collection of objects called vectors, which may be added together and multiplied ("scaled") by numbers, called scalars. Scalars are often taken to be real numbers, but there are also vector spaces with scalar multiplication by complex numbers, rational numbers, or generally any field. The operations of vector addition and scalar multiplication ...

In mathematics, an algebraic differential equation is a differential equation that can be expressed by means of differential algebra. There are several such notions, according to the concept of differential algebra used. The intention is to include equations formed by means of differential operators, in which the coefficients are rational functions of the variables (e.g. the hypergeometric ...

We define the homology of a simplicial set with coefficients in a Segal's  $\Gamma$ -set ( $\mathbf{S}$ -module). We show the relevance of this new homology with values in  $\mathbf{S}$ -modules by proving that taking as coefficients the  $\mathbf{S}$ -modules at the archimedean place over the structure sheaf on  $\overline{\text{Spec } \mathbb{Z}}$  introduced in our previous work, one obtains on the singular ...

At some point a longer list will become a List of Great Mathematicians rather than a List of Greatest Mathematicians. I've expanded my original List of Thirty to an even Hundred, but you may prefer to reduce it to a Top Seventy, Top Sixty, Top Fifty, Top Forty or Top Thirty list, or even Top Twenty, Top Fifteen or Top Ten List.
